

Switch Dual Monitor Arm in Vertical Configuration

EVO Monitor Arm

Monitor Arms

Mounting Your Monitors To An Arm Adds Desktop Space

If you need to maximize your desktop space, would like to reposition your monitor easily and quickly, or need the ability to totally move your monitors out of the way, adding a monitor arm to your desk is a great option. Caretta offers a wide variety of monitor arms to enhance the functionality of any office. We have arms for a single monitor or multiple monitor arrays in many different configurations. There are even arms that can attach an iMac, tablets, and laptops to your desk.

Our Artistic, Modern Urban, Standing, and Traditional computer desks have a monitor arm mounting location integrated into the center of the desktop. This creates a clean look because the arms do not require an edge clamp. The bull-nose edge is preserved all the way around the desk.

We offer a selection of the most popular monitor arms in our standard product offering. If you do not see an arm that will work for you, just ask. There are many other options available.

If you do not see the perfect monitor arm for you, just ask. We have selected a few of the most popular models for our standard product offering, but there are many other versions available.

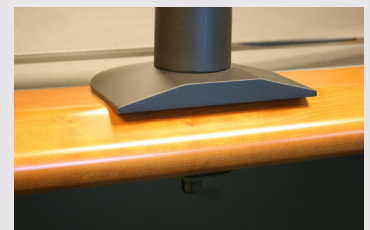

- Adds Desktop Space
- Easily Move Monitors
- Single or Multi-Monitors
- Horizontal or Vertical Monitor Orientation

Dual Monitor Arm

iMac Monitor Arm

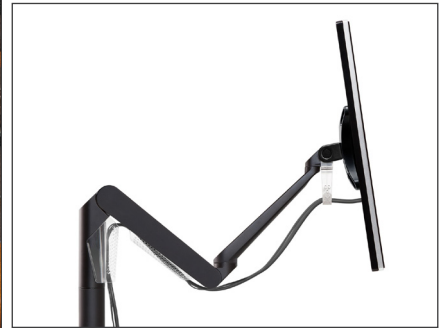

For our Premium Wood Desks, there is a monitor arm mounting location integrated into the desktop. This eliminates the need for edge clamping that breaks up the look of the bull-nose edge.
